問3 (C)

問4 (B)

問5 (C)(E)

問6 (A)

2

問1 (D)

問2 セイラーと彼の協力者たちは、人々の行動の仕方についての従来の経済理論は、人々の実際の行動の仕方を説明していない / できていないので、十分に正確ではないと主張した。

問3 (A)

問4 健康に良くない食べ物の前に健康に良い食べ物を置くこと。

問5 (C)

問6 democracy

3

A

- ... because students can learn about different ideas and acquire more balanced skills by studying them.
- ... because students can get a wide range of knowledge applicable to different careers by studying them.

B

- There are lots of people who have achieved success in many specialized fields after receiving a liberal arts education.
- There are lots of people who have succeeded in many specialized fields by using the skills they learned from their liberal arts education.

C

I think that it is more important in the near future for students to study specialized, practical majors at university. This is because if a student is already well-trained in his or her subject, companies do not have to spend as much time and money on specialized trainings. Also, for students, job hunting will be easier if they already know what fields they want to enter and have already acquired the knowledge and experience related to their future jobs. (79 words)

In the near future, liberal arts will be considered more important than practical majors such as business or engineering. The first reason is that the world is changing very quickly, so the knowledge base in practical majors quickly becomes outdated. For example, the code that computer science students learn in their first year may be obsolete by the time they graduate. The second reason is that students need problem-solving and critical thinking skills more than ever. No matter what career students eventually choose, these liberal arts skills will be essential.
