Question A

In the second paragraph, a commentator on the Japanese TV show expressed a _____ ① _____ of the foreign visitor's reaction, because _____ ② _____.

- ① negative [critical] opinion [view]
- ②
 - slurping noodles is closely connected to [deeply rooted in] Japanese food culture
 - slurping noodles is acceptable in Japan

Question B

According to the third paragraph, slurping noodles has practical benefits such as _____ ① _____, _____ ② _____, and increasing engagement in the dining experience.

- ① enhancing the flavor [taste] of the food
- ② cooling down the noodles to prevent burns

Question C

I think that slurping noodles when eating next to a foreigner is problematic. First, the habit of slurping is generally not accepted in other countries. If the foreigner does not know much about Japan, they would think that your table manners are bad and could form a negative impression that all Japanese people are rude. Also, since the sound of slurping is not pleasant, the foreigner may lose their appetite, and this could ruin their restaurant experience. When next to a foreigner, you should refrain from slurping for both Japan's reputation and for the enjoyment of the foreigner's meal.

(99 words)

I don't think that slurping noodles when eating next to a foreigner is problematic. First, Japanese customs should not be changed just because of foreign people. The foreigner must realize that they are in a country that has different customs than theirs. Also, if the foreigner is visiting Japan, they are most likely interested in Japanese traditions and culture that are different from their own. The slurping would be fascinating to them, and it may stimulate their interest in learning more about the uniqueness of Japan. Japanese people should continue to practice Japanese traditions no matter who is around.
